

ENGLISH

This term, children will further enhance their writing skills by building upon previously taught skills and incorporating new ones. They will use these skills to create various types of texts inspired by our class reading, 'The Firework Maker's Daughter.' In reading, our focus will be on strengthening the children's ability to make inferences and summarising a range of different texts. Alongside this, the children will continue to develop their skills in reading aloud.

HUMANITIES

This term, the children will continue learn about realm of British prehistory, spanning from the Stone Age to the Iron Age. They will uncover how ingenuity, intervention and technological progress shaped the lives and lifestyles of ancient Britons. The children will also be introduced to the world of Bell Beaker Folk and deepen their understanding of concepts related to wealth and power.

MATHS

This term, the children will continue developing their place value knowledge. The children will continue focusing on addition and subtraction, tackling problems that involve up to 3-digit numbers and be introduced to concepts like exchange and regrouping. Additionally, the children will delve into multiplication and division, learning about various methods to perform these calculations effectively.

YEAR 3 AUTUMN TERM 2

DT

This term, the children will learn about the different food categories and the nutrients they offer. Next, they'll explore how to get ready for cooking and then actually cook different foods. They'll also learn how to prepare, handle utensils and cook food safely.

PE

This term, the children in 3J will dive into the world of fitness. They'll explore a variety of activities aimed at enhancing different aspects of their health and fitness. In 3B, the children will focus on enhancing their balance, running, jumping, hopping, and skipping abilities.

MUSIC

This term, children will continue learning the recorders, along with playing different notes and songs, whilst also focusing on the beat and pitch.

SCIENCE

This term, the children will continue learning about the role of a skeleton and muscles along with identifying animals with different types of skeleton. They will then move onto exploring rocks, where they'll learn to compare and group them by appearance, properties and uses. They will also get a basic understanding of how fossils are formed and explore their local environment to study soils, making comparisons.

COMPUTING

This term, the children will start by understanding basic animation methods and then use them to craft their own animations, in the style of flip books. Afterwards, they'll expand their skills and use them to create stop-motion animations.

RE AND PSHE

In PSHE, students will delve into a variety of topics about safety. This includes identifying hazards in their local environment and at home and what they can do. In RE, the children will continue learning about what they can do to take care of the environment around us, and the beliefs different religions have on it.
