

# ENGLISH

This term in reading, the children will be reading a fiction text called Roman Tales: The Goose Guard. The children will complete a range of different style questions using their prediction, inference and retrieving skills. In writing, the children will be writing a biography, setting description and a narrative. They will focus on the effect they want to have on the reader and what skills they would use to create that impact.

# HUMANITIES

This term, the children will learn about the history and structure of ancient Rome and the Roman Empire. They will begin with looking at the founding of ancient Rome, the expansion of the Roman empire and how different Romans lived. The children will then learn and explore the process of Romanisation of Britain.

# MATHS

This term, children will begin by learning about unit fractions. They will learn to identify the whole number and represent it in various ways. Pupils will also study non-unit fractions and learn to add, subtract, and compare them. Finally, they will explore the properties of polygons, including parallel and perpendicular lines.

# YEAR 3 SUMMER TERM 1

# THE ARTS

This term they are exploring a project called 'Beautiful Botanicals'. It is project that teaches children about the genre of botanical art. They create natural weavings and beautiful and detailed botanical paintings of fruit.

# P.E

This term, children in 3B will be learning outdoor adventurous activities. In these sessions, pupils will develop their problem solving skills through tackling and a range of challenges. The children in 3G will develop skills like, running, jumping and throwing.

# MUSIC

This term children will learn to play Bringing Us Together. They will learn to play the song with notation by using their recorders. As well as composing and improvising.

# SCIENCE

This term, children will learn plant nutrition and reproduction. Children will learn about plant structure and identify plant parts associated with water transport and reproduction. In these lessons, children will build on previous knowledge, such as names and describing the function of different parts. With this knowledge, the children will create A life cycle of a flowering plant.

# COMPUTING

This term children learn the fundamentals of coding using interactive games and written code. Through the Apple Swift Playground App, children will solve simple puzzles to learn various coding concepts and elements.

# RE AND PSHE

This term, the children will be taught about the teachings of various religions, such as Sikhism, Judaism, Christianity and Islam, regarding honesty. This will be achieved by instructing them on being open and truthful. In PSHE, the children will be learn about the nutritional benefits of a healthy diet and the affects. They will also learn about oral hygiene.
